

MC ProWrist Changes

Bulletin

Please Note

The MC ProWrist has been changed slightly. It has now been configured to be used with 3-pin and 2-pin, half moon connectors common in the field. The Prosthetist Manual has been modified to show this change.

Please study the included Prosthetist Manual. We are doing our best to update orders as they are placed, but if there is any question with the components received, please call us and we will be happy to provide any assistance necessary.

This change will improve the ease of ordering and interchangeability of Motion Control components.

Thank you,

Motion Control, Inc.
