

ProControl 2

Motion Control
division of
Fillauer®

ProControl 2 from Motion Control

Product Description

The ProControl 2 provides the ability to myoelectrically control both the terminal device(s) and the wrist rotator from one modular controller. Requires Motion Control Standard Hand or ETD.

Using microprocessor technology, you can tailor the inputs and the outputs to the patient's needs. Switching between the hand and the wrist is easy – choose from three options. A variety of available harnesses and/or wire adapters allows for almost any battery or input combination.

Satisfaction Guarantee

30 days from date of shipment
